Cupcake box size guide

Measure the liner base (the cavity grips it), the widest point of the cupcake top, and the tallest frosting swirl. The count sets the footprint and the swirl sets the height. Sizes are inside dimensions. 1 in = 2.54 cm.

One large cookie or a short stack of 3 in cookies	6 x 6 x 2	15.2 x 15.2 x 5.1	listed: single piece, optional window

Pies

Listed item with a fixed price

Item	Inside size	Board	Print	Price, 1 piece
Pie Boxes	10 x 10 x 2.5 in about 25.4 x 25.4 x 6.3 cm	18pt paperboard (SBS)	full color outside	**$5.59**

Pie box size guide

The size on a pie pan is a name, not a box size: measure the baked pie across its widest point (crimp included) and from the bottom of the tin to the tallest point, then add room on every side and above. 1 in = 2.54 cm.

Pie (measured)	Box (inside, in)	Our listed option
under about 9.75 in across, under about 2.25 in tall (most standard 9-inch pies)	10 x 10 x 2.5 (25.4 x 25.4 x 6.4 cm)	Thanksgiving pie box packs (250, 500) and a single piece
9-inch with meringue or a tall topping	10 x 10 base, taller height	made to your measured height
10-inch pie (often 10 in or more across the crimp)	one size up from 10 x 10	made to your measured width and height
deep-dish pie	your width + room x your height + headroom	made to order
slices and hand pies	small bakery box	bakery boxes, made to size

Test one single printed box with each pie on your menu before ordering the run.

Options

- **What it is:** Shallow square printed box sized to a whole baked pie, with a lid that clears the crust or topping
- **Styles:** Lock-corner or tuck-top pie box; window or solid lid; handle box for gifting; small boxes for slices and hand pies
- **Board:** SBS paperboard (listed); kraft board; ask a specialist about grease-resistant coatings and food-contact board
- **Extras:** Inserts that hold the tin, liners, flavour stickers for one printed design across several pies
